February 26, 2025 • 2 min read

Cloud has matured from cutting-edge technology in the early 2000s to a reliable, robust, proven platform today. In fact, cloud has become such an integral part of the current computing ecosystem that it's now the preferred environment for deploying the next wave cutting-edge technologies like [AI](#).

Whether it's [private cloud](#), [public cloud](#), or a [hybrid model](#), cloud has moved from disruptor to mainstream because of the clear benefits it offers to organizations of all sizes. Gartner [predicts](#) cloud will become a business necessity by 2028. It's time to consider [cloud migration](#).

Benefits of cloud

Still not sure cloud is for you? Check out the advantages cloud offers:

- 1. Cost savings**—With cloud you can shift from capex to opex for pay-as-you-go pricing. You only pay for what you use.
- 2. Security and compliance**—Cloud providers invest heavily in robust security infrastructure to meet government and industry standards to ensure your data is compliant.
- 3. Greater efficiency**—Skip the tedious tasks of upgrading hardware and software; your cloud service provider does it for you. Redeploy your IT staff on more strategic projects.
- 4. Improved business continuity and disaster recovery**—Enhance resilience and ensure business continuity with [robust cloud-based disaster recovery solutions](#).
